ABOUT ME

As a Computer Science Engineering student, I bring innovative thinking to every challenge. My strong grasp of SQL, databases, and web development, along with team management skills, enables me to apply analytical skills in a reputable organization. I am committed to contributing to team success and continuously expanding my knowledge as a Data Analyst.

EDUCATION

08/2022 - 06/2026	⋮	Bachelors in Computer Science Engineering (8.06 cgpa) Chitkara University
04/2021 - 03/2022	⋮	12th Grade (86.4%) DAV SCHOOL (CBSE Board)
04/2019 - 03/2020	⋮	10th Grade (89.6%) DAV SCHOOL (CBSE Board)

SKILLS

- Data Analysis: SQL, Python (Pandas, NumPy), Data Cleaning, Exploratory Data Analysis.
- Web Development: HTML, CSS, JavaScript, React.
- Database Management: SQL, MongoDB.
- Tools and Technologies: Git, GitHub, VSCode, Jira.

CERTIFICATIONS

- 1) Completed L4G-Google Gen AI course by Google cloud.
- 2) Got a badge in cyber security CISCO Specialisation.
- 3) Certificate in Strategic Leadership: Impact, Change, and Decision-Making

PROJECTS

MindLink

📅 11/2024 - 12/2024

- A Group Study Site that enhances collaborative learning.
- Developed a Website that provides students a platform for collaboration through interactive video calls and meetings
- Analyzed user engagement patterns for meetings, chats, and collaboration features.
- Collaborated with team members and employed **Jira** to track progress and manage tasks.

Calories Burnt Predictor

📅 07/2023 - 08/2023

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

- A predictive tool for estimating calories burnt. It uses ML to estimate calories burnt during activities.
- Performed data cleaning, preprocessing, and analysis on two datasets related to physical activities.
- Used Pandas for handling missing values, feature selection, and data manipulation and built a predictive model based on analyzed data to estimate calories burnt.

Medical Hub – Full Stack Medical Appointment & Healthcare Platform 📅 5/2025 - 6/2025

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT, REST APIs

- Built a full stack healthcare application to streamline online appointment booking and patient interaction.
- Wrote SQL queries to handle appointment records, doctor details, and patient data.
- Developed features for booking, viewing, and managing appointments along with detailed doctor profiles.
- Designed and managed structured healthcare data using MySQL.
