ABOUT ME

As a Computer Science Engineering student, I bring enthusiasm and innovative thinking to every challenge. My strong grasp of programming and web development, coupled with my team management skills, positions me to leverage analytical skills in a reputable organization. I am committed to contributing positively to team successes and continuously expanding my knowledge.

EDUCATION

08/2023 - 06/2027	↑	Bachelors in Computer Science Engineering (8.06 cgpa) Chitkara University
04/2022 - 03/2023	•	12th Grade (79%) DAV SCHOOL (CBSE Board)
04/2020 - 03/2021	↓	10th Grade (89%) DAV SCHOOL (CBSE Board)

SKILLS

- Programming Languages: Java, C++, JavaScript.
- Web Development: HTML, CSS, JavaScript, React
- Database Management: SQL, MongoDB
- Tools and Technologies: Git, GitHub, VSCode, Jira.

CERTIFICATIONS

- 1) Got a badge in cyber security CISCO Specialisation.
- 2) Certificate in Strategic Leadership: Impact, Change, and Decision-Making
- 3) Cisco: Introduction to data science

PROJECTS

MindLink

📅 11/2024 - 12/2024

- A Group Study Site that enhances collaborative learning
- Developed a Website that provides students a platform for collaboration through interactive video calls and meetings
- Created group chats for users to share notes and study materials
- Collaborated with team members and employed Jira to track progress and manage tasks
- Conducted rigorous testing and debugging to ensure platform functionality

Expense Tracker | MERN Stack Project

- Developed a **full-stack expense tracking web app** using **Node.js, Express, MongoDB, and React**.
- Designed and implemented **RESTful APIs** for CRUD operations to add, view, update, and delete expenses.
- Created **aggregation routes** for monthly totals, category-wise summaries, and recent transactions.
- Integrated **Chart.js** for data visualization (Pie, Bar, and Line charts showing expense insights).
- Added **JWT authentication, bcrypt-based password encryption, and filters/search/export (CSV/PDF)** features.
- Enhanced UI with **Bootstrap**, ensuring responsive design and seamless API integration via Axios.
- Deployed the **backend on Render/Heroku** and the **frontend on Netlify/Vercel**.

Language Learning app

This app is designed to help you learn a new language in a fun and effective way. You can choose from over 30 languages, including English, Hindi, French and German. You can practice your listening, speaking, reading, and writing skills with interactive exercises, games, and stories. Whether you want to travel, work, or study abroad, this app will help you achieve your language learning dreams.
